

4Stop Closes €2.5M Series A Round to Expand Its Global KYB, KYC, Compliance and Anti-Fraud Technology

News provided by **4Stop** on Wednesday 15th May 2019

“We believe 4Stop has only begun to realize its potential and is well on its way to turning the burden of compliance into a driver of business...

4Stop (“FourStop GmbH”) a leading global [KYB, KYC, compliance and fraud prevention](#) provider announces today its successful completion of a German-based €2.5 Million Series A Round Investment from [Ventech](#) (the leading pan-European VC fund investing in early-stage tech-driven start-ups).

The syndication of the investment from Ventech and due-diligence process was performed by renowned leading international attorneys and audit companies based out of Germany. Following, 4Stop’s business, team, and current technology solutions received high standards of performance excellence. (For more information, please contact finance@4stop.com).

Ingo Ernst, CEO of 4Stop states: “This is another major milestone for [4Stop](#), one that we are all very proud of achieving and a true endorsement of our business and technology potential. We are very excited to take this opportunity to expand our business, team and our KYB, KYC and anti-fraud technology solutions. Allowing us to further facilitate modern, leading-edge risk-based management, from a single API solution.”

The global growth of online transactional engagement paired with its increasing fraud rates, identity thefts and continuous evolution of the regulatory requirement landscape makes it imperative for businesses operating online to ensure they implement a solution that future-proofs their compliance and fraud defence. A need for simplistic, all-encompassing risk management solutions is proving pertinence and supports 4Stop's technology development, market value proposition and strategy.

4Stop dramatically saves businesses time and money [underwriting merchants](#), managing their [anti-fraud processes](#) and eliminates the need to integrate multiple 3rd party [KYC data sources](#). "We provide businesses with near real-time KYB, thousands of global data points, hundreds of KYC data sources and leading-edge, smart anti-fraud technology, all from a single API integration. Ensuring the most efficient, optimal data experience and futureproofed risk management processes are obtained. Bringing confidence to every merchant onboarded through to their customers and associated transactions, empowering and accelerating business performance", states Ernst.

4Stop's technology has received "[Best Financial Transaction Security Platform](#)" by Fintech Breakthrough Award earlier in 2019 and has received "Best Risk Management Solution Provider" in 2017 and 2018. Additionally, 4Stop's value proposition has already been implemented by global payment and crypto leaders including Mifinity, Paymentz, Paysend, Gatehub and Draglet.

"We believe 4Stop has only begun to realize its great potential and is well on its way to turning the burden of compliance into a driver of business operations excellence in the payment & Fintech industry; Ventech is thrilled to partner with 4Stop in their next chapter. We look forward to leveraging our broad and strong investment expertise and 20+ years of experience internationalizing of early-stage companies," explains Ventech Principal Stephan Wirries
